CLOUD-NATIVE SECURE PRINTING FOR ANY NETWORK CONFIGURATION

With Beacon, you can secure your organization's devices and printing workflows from the cloud. Whether you want to minimize or completely eliminate your printing infrastructure, our cloud-native secure print services will work for you—no matter what type of network architecture you have.

- Support for **zero server infrastructure** environments (no local servers or VPN required)
- **OpenID Connect** integration for user registration
- **Secure printing** with or without a corporate network
- Print submission from your **desktop** (Windows, Mac, Linux) or **mobile** device (iOS, Android)
- **Driverless printing** using **IPP/E technology**
- **AES 256-bit** encryption for data at rest and **TLS v1.2** for data in transit
- Print release using **card authentication**, **user credentials**, or **mobile QR code**
- **Simple user registration** via Active Directory, OpenID Connect, and email enrollment
- Documents are **available anywhere, anytime** with cloud storage
- Support for 11 **local languages**
