**Digital Check’s SmartSource elite series scanners receive a boost in speed without an increase in price.**

**Key Points:**

- The higher speed is enabled by a new firmware version that will be standard on all new devices, with no mechanical changes – effectively a no-charge upgrade for customers who purchase new SmartSource scanners.
- DCC is constantly searching for ways to make their devices more efficient, as part of their process of continuous improvement. In this case, DCC’s regular development cycle was able to produce a roughly ten percent performance increase from the same hardware.
- Notably, the higher speed does not result in any compromises on image quality; the scanners still capture and process images at their full resolution.
